ENG 2: WIRELESS HEALTH ENGINEERING

Hands-on Engineering Design and Implementation for building end-to-end solution for real world problems.

- Winter Quarter 2015
- Class # 831459
- EBUII 330
- Thursdays, 5:00-6:50PM

- Gain skills needed in the Industry
- Learn about Sensors, Instrumentation, Circuit Design, Debugging and Analytics
- Present your work to a panel from the Industry
- Get introduced to Internet of Things and Bio-feedback
- Continue the work for Senior Design Project

Software & Hardware Skills Gained

<table>
<thead>
<tr>
<th>LabView</th>
<th>Solidworks</th>
<th>MATLAB</th>
</tr>
</thead>
<tbody>
<tr>
<td>LittleBits</td>
<td>Intel Galileo</td>
<td>Multisim</td>
</tr>
<tr>
<td>Broadcom Wireless Solution WICED</td>
<td>IPython</td>
<td></td>
